

Corporate Web Solutions

promote your business and sell products on the Internet

Affordable Websites that Work

Corporate Websites

We can design and build a full corporate website to promote your business and sell products or services on the Internet. This is the choice for larger business in need of a strong, professional corporate image. Where required it includes a fully functional e-commerce store capable of listing an unlimited number of products.

Using our Studio you have **Content Management System (CMS)** capabilities to give you full control over adding and editing pages, creating new product categories and adding products. You can add and update text and images for your company information, team members, testimonials, contact forms and much more.

Mti Corporate Websites are **Search Engine Optimisation (SEO)** friendly, providing you with the ability to edit keywords, descriptions, titles and tags for each page or site-wide to support search marketing and website visibility.

With our '**Pay as you grow**' option we can spread cost across monthly payments with no interest charges, contracts or financing, we make life easy.
